

The Trinational Agglomeration Basel: the area has experienced major growth since 1850

The Trinational Agglomeration Basel: a cross-border economic area with 800 000 inhabitants

The Trinational Agglomeration Basel: a cross-border economic area with 800 000 inhabitants

TEB: a tool for cross-border governance of Switzerland, France and Germany

An association for cross-border territorial development since 2002 with the support of local and regional authorities

A place for discussions, reflections and ideas about development for the different territories

a think-tank to search for effective solutions to cross-border public transport, urban sprawl, development of the area

To develop a collective strategy,

to find solutions and construct infrastructure,
which are supported by the German, Swiss and French partners

2005-2008: Development of cross-broder geodata for spatial analysis

Trinationaler Eurodistrict Basel Eurodistrict Trinational de Bâle

Eine Zukunft zu Dritt: Entwicklungsstrategie 2006 – 2020 Un Avenir à Trois: Stratégie de Développement 2006 – 2020

Band 2: Die Entwicklungsstrategie / Tome 2: La stratégie de développement

Bericht zur Vernehmlassung Rapport pour consultation

Example: administrative boundaries

Example: Statistics on population

Example: Job market

Example: industrial areas near the border

Karte 5: Grenzen und Barrieren im Siedlungsgefüge Carte 5 : Frontières et barrières dans le tissu urbain

Analyse 2007

Infrastruktur, Gewerbegebiete, Verkehrsachsen usw. durchschneiden heute die Siedlungsbereiche und wirken so als:

Les infrastructures, les zones d'activités, les axes de circulation, etc entrecoupent les zones urbanisées et agissent en tant que :

- Barrieren im trinationalen Siedlungsraum / Barrières au sein de l'espace trinational urbanisé
- Barrieren um den Stadtkern / Barrières autour de la ville centre
- Verstärkung der institutionellen Grenzen / Renforcer les frontières institutionnelles

Legende / Légende

Infrastruktur, Gewerbegebiete, grosse Verkehrsflächen usw. / Infrastructures, zones d'activités, espaces de transports, etc...

Siedlungsfläche / Espaces urbanisés

Gemeindegrenzen / Fontières communales

Rhein und Zuflüsse / Rhin et affluents

Example: landscape typology

Example projects for public transport

- data availability
- different definitions of data = heterogeneity
- different projections
- different perimeters
- different rights
- costs
- maintenance

A project idea:

FCH

Development of a GIS-Platform/SDI for the TEB area

2012: TEB starts of a desirability and feasibility study

to examine the interest in an improved cross-border GIS-infrastructure

Identify the needs in the TEB area

(partners, cross-border institutions, potential users) (users, data, functionalities, best practices/benchmarks)

Recommend solutions

(technical, costs, maintenance, target group)

the interest in cross-border spatial data exists, but has to be further specified for the data to become an effective tool which can be used by local authorities, citizens and other groups

The project GEOURBAN forms a good starting point to develop new cross-border applications for the trinational area TEB, but coordinating the three countries requires more resources
